In the use of graphics, the graphic design has more performances than the web design, especially for the product websites. The modular design makes the idea become more clear, and the same on the visual performance. Moreover, the graphic design is no need to take the final effect into account.

Web Design vs. Graphic Design, What's the Difference?

Robin Williams is the author of dozens of bestselling and award-winning books, including *The Non-Designer's Presentation Book*, *The Non-Designer's InDesign Book*, and *The Mac is not a typewriter*. Through her writing, teaching, and seminars, Robin has educated and influenced an entire generation of computer users in the areas of design, typography, desktop publishing, the Mac, and the Web.

The Non-Designer's Design Book (4th Edition): Williams ...

Web design and graphic design are both visual mediums — both roles involve designing for visual communication, and they depend on the harmony between copy and visual elements to tell a story. Though their boundaries overlap, both exist as different disciplines, with different areas of expertise important to the web design process.

7 ways web design is different than graphic design ...

The many 5-star reviews here by web design experts led me to choose this book to help build my website. But this is the viewpoint of a beginning web-builder, albeit someone who has had a lot of experience of learning from books. The book is NOT about user experience, the aesthetics of web design, search engine optimization, etc..
